Product/UX Designer with 4+ years of experience designing complex B2B, SaaS, and enterprise products across healthcare and IT domains. Grounded in user research and usability testing, translating ambiguous technical and business requirements into clear interaction models and prototypes. Partner directly with product managers, requirement engineers, and developers within agile teams, communicating design decisions and iterating from insight through to shipped, measurable outcomes.

Experience

Global Software Resource | UX Designer | Client: Siemens Healthineers

May 2024 — Present

- Conducted **user interviews and usability testing** to identify workflow issues on an enterprise troubleshooting platform, contributing to an estimated **~30% faster issue resolution**.
- Designed user experiences for an **enterprise troubleshooting platform used by medical technicians at Siemens Healthineers**, translating complex diagnostic workflows and stakeholder requirements into clearer product experiences.
- Contributed to an **AI-assisted support platform handling 300–400 diagnostic tickets per day**, working across research, interaction design, and product delivery for the Siemens Healthineers project.
- Collaborated with **product managers, requirement engineers, and developers** to translate requirements into UX solutions and support iterative product delivery.
- Worked within agile teams to refine workflows, communicate design decisions, and support feature delivery from design through development.

BETSOL | UX Designer

June 2022 — April 2024

- Designed UX for an **enterprise backup and monitoring product used by IT administrators**, working across complex product workflows and administrative experiences.
- Redesigned onboarding and core workflows to **reduce setup complexity and improve usability** for enterprise users, based on observed user friction.
- Contributed to improvements in key product flows that supported **~40%+ higher trial-to-paid conversion**.
- Built and maintained **reusable design components**, improving consistency across product experiences and supporting efficient design-to-development handoff.
- Collaborated within agile delivery teams, working with product and engineering stakeholders through design iteration, feedback, and implementation.

Education

Mumbai University

2022

Bachelor of Engineering — Computer Engineering

Skills

Design & Research

User Research, User Interviews, Usability Testing, Interaction Design, Problem Discovery, Information Architecture, User Flows, Journey Mapping, Wireframing, Prototyping

Collaboration & Communication

Design Storytelling, Stakeholder Collaboration, Cross-functional Collaboration, Design Critique, Feedback & Iteration, Agile/Scrum

Design Systems & Quality

Design Systems, Component Design, Accessibility, WCAG 2.1 AA, Visual Design, Responsive Design

Tools

Figma, FigJam, Miro, Adobe Illustrator, Photoshop, Claude, Lovable

Recognition

Best Performing Employee — Siemens Healthineers

Top 10% UX Designer — Upwork

HIE-HQ | UX Trainee

January 2022 — May 2022

- Supported research, wireframing, and prototyping across multiple client projects.
- Assisted in creating internal **design systems and shared design tools** used by designers.
- Participated in design reviews and feedback sessions to improve design quality and communication.
- Developed foundational experience in UX research, interaction design, collaboration, and design execution.
